

A New configurations

B New sources or students

C New evaluation distributions

Additive contrast: 1B circles; 4B development triangles

● Math ● Code ● Qa

Filled circle: within stated band; hollow circle: outside; triangle: development student; cross: interval not tested.
 Whiskers: stored measurement bands (corner $\pm$ twice registered noise). Missing intervals remain unclassified.
 Primary QA corner additivity: failed to reject; full response transfer to fresh distributions: not tested.
