

A New configurations

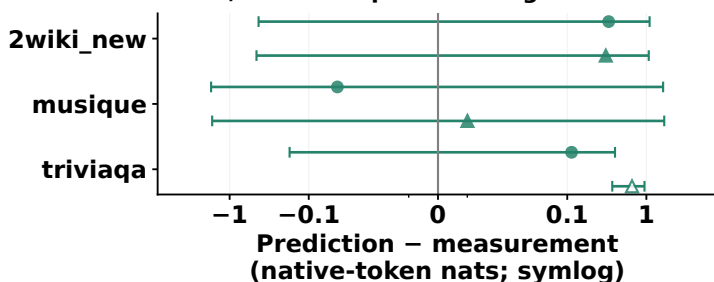

B New sources or students

C New evaluation distributions

Additive contrast: 1B circles; 4B development triangles

● Math ● Code ● Qa

Filled circle: within stated band; hollow circle: outside;
triangle: development student; cross: interval not tested.

Whiskers: stored measurement bands (corner $I \pm$ twice registered noise).
Missing intervals remain unclassified. Primary QA corner additivity:
failed to reject; full response transfer to fresh distributions: not tested.
