

A New configurations of seen states

MAE: hollow = baseline; filled = relation; green = lower | ○ Math □ Code ◇ QA | Whiskers: paired gain CI | Corners: ● in band / ○ outside; △ 4B development

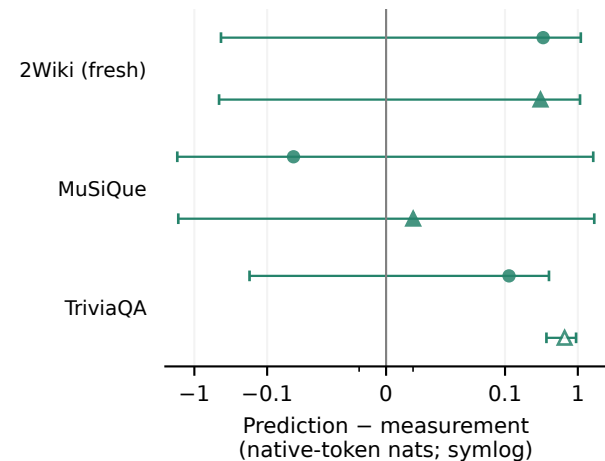

Paired gain CIs are translated about the fixed baseline MAE; corner whiskers are registered ± 2 -noise bands.

B New sources or students

C New evaluation distributions

No frozen response-law predictions on fresh evaluation distributions. Only registered corner contrasts are available below.

Primary QA additivity:
